

Measure, reduce & monitor human risk

Reduce user-related security incidents caused by human error and drive resilience to phishing attacks through personalised staff training programmes.

Sources: Verizon DBIR 2021

Humans are targets

36% of data breaches involve phishing.

Humans make mistakes

90% of data breaches involve human error.

Compliance is essential

Key standards like ISO 27001 require regular staff training.

Transform your employees into your first line of defence

Whether it's sharing passwords with colleagues, emailing sensitive data to the wrong recipient or falling victim to a phishing attack, employees are seen as the 'weakest link' in your cyber security.

That's why it's vital to understand where the human vulnerabilities exist within your business and to train staff regularly to reduce the risk of a data breach, fines or damage to your business's reputation.

Human Risk Management (HRM) is the new class of user-focused security that enables you to do just that through personalised security awareness training programs, periodic phishing simulation campaigns, simplified policy management and ongoing dark web monitoring - completely managed for you.

Benefits-at-a-glance

- ✓ Drive user resilience to sophisticated phishing attacks
- ✓ Reduce user-related security incidents caused by human error
- ✓ Demonstrate compliance with key standards like ISO 27001 and GDPR
- ✓ Understand your business's employee security posture with a human risk score
- ✓ Dig deep into ongoing human risk with training, phishing and policy reporting
- ✓ Save time with readily-made courses, phishing campaigns and policy templates
- ✓ Simple setup, fast deployment and automated staff training reminders

Key Features

Security Awareness Training

Assess each user's security knowledge gaps and automate regular training courses that tackle their unique risk areas.

Dark Web Monitoring

Detect when stolen user credentials are found on the dark web that could be used to launch an attack.

Simulated Phishing

Automate periodic phishing simulations that assess your employees' ongoing risk to a range of attack techniques.

Policy Management

Keep users well-versed on security processes with easy policy management and trackable eSignatures.

Everything you need to tackle human risk:

- Personalised and fully automated training programmes for every user, based on an initial 10-minute Gap Analysis quiz
- Bite-sized video and interactive training courses
- Compliance and infosec training course library
- Custom course builder/learning management system
- Automated course completion reminders
- Custom phishing template builder and automated scheduling
- Pre-loaded policy library filled with essential security policies
- Weekly manager summaries
- Company-wide risk scoring and user-level risk profiles
